Danske Commodities signs ten-year deal to supply British offshore wind for global household brands

Aarhus, Denmark, 19 November 2026. Energy trading company Danske Commodities announced today that it has signed a ten-year power purchase agreement with consumer goods company Reckitt. The agreement will help power the production of Reckitt's global brands with renewable energy from British offshore wind.

Reckitt was founded in 1840 in Hull, United Kingdom. Today, the historic Hull site continues to handle active manufacturing alongside global research and product development for many powerbrands within the company's portfolio.

Just off the Yorkshire coast from the Hull site, the Dogger Bank offshore wind project is under development. Soon, renewable energy from British offshore wind will help supply electricity for the production of Reckitt's products at the site.

Through a power purchase agreement (PPA), Danske Commodities will sell fixed-price baseload power with Renewable Energy Guarantees of Origin (REGOs) from the Dogger Bank B offshore wind farm over ten years.

"We are proud to enter our first long-term corporate PPA with a world-class consumer goods company like Reckitt. Through Danske Commodities' wide asset portfolio in the UK, we can provide baseload renewable energy, which supports both sustainability efforts and risk management needs," said Jesper Tronborg, Senior Vice President, Head of Origination & New Markets at Danske Commodities.

The ten-year agreement was facilitated by LevelTen Energy and will commence in January 2028.

FACTS ABOUT THE AGREEMENT

- Ten-year corporate power purchase agreement (cPPA)
- The agreement is structured as fixed-price baseload power with REGOs from Dogger Bank B
- Dogger Bank B is a new-build offshore wind farm with a total capacity of 1.2 GW, owned by Equinor (40%), SSE Renewables (40%) and Vårgrønn (20%)
- Effective as of 1 January 2028
